

Vehicles and Parking at Camp

The health, safety, and well being of our members, volunteers, and parents is paramount. The number one cause of fatalities, injuries, and insurance claims throughout the BSA involves vehicles in camps. Rules and policies are in place to reduce potential hazards and events and help ensure everyone has an enjoyable time. Please review the policies below so that you are aware and do your part to reduce hazards and ensure the safety of yourself and others.

- Units may obtain a vehicle pass to drive to their site and unload.
- No vehicles may leave the roads, drive into camp sites, nor park off any road unless it is a designated camp site parking area.
- Adults with a valid handicap, or designated as a “staff vehicle” by the KSR Ranger or event management may obtain a pass from the Administration Building which must be displayed on the vehicle’s dashboard then park where directed by the event management.
- All vehicles should remain parked in the main parking lot by the Dog Trot. Overflow and staff parking are in the Hallett lot and behind the dining hall. In the event that additional “overflow parking” is needed that parking area will be designated by the KSR Ranger and event management.
- Please obey posted speed limits.
- Please follow the designated traffic flow of the camp roads; i.e. “one way traffic”.
- Seatbelts must be worn at all times.
- Absolutely no one is allowed to ride in the bed of a pickup truck at any time.
- Vehicles will remain in the parking lot unless there is an emergency or pre-approval from event management.
- Units may drop a trailer at the entrance of a campsite and immediately return to the designated parking area.
- The KSR Ranger and event staff will employ a zero-tolerance policy when it comes to mobile vehicles on camp property during events. **Violations may result in eviction of the vehicle.**
